

CapriMAX

THE ULTIMATE MILKING CLUSTER FOR GOATS

The CapriMAX milking cluster is the ultimate milking solution for progressive dairy goat farmers. Numerous innovations ensure best results in terms of milking speed and quality, ruggedness and comfort.

Discover optimised milking

Attach quickly and efficiently - Two perfectly integrated, independent automatic valves make it possible to milk each teat independently while maintaining excellent milk flow.

Unrivalled milking speed - Thanks to the patented alternative air inlet valve on each teat cup. This system ensures perfect stability of the teat end vacuum and unrivalled milking quality notably by eliminating the phenomenon of back-spray.

Simple and robust design - Claw and teat cup shells made from highly resistant PPSU resin; reduced number of parts and therefore simplified maintenance without tools.

Ergonomics and comfort - Designed for easy handling; optimized teat cup size.

Versatility - Perfectly suited for all milking parlour types. It offers the same milking performance regardless of milking parlour configuration.

Efficient cleaning - Innovative jettors ensure the perfect functioning of the milking clusters at each milking shift.

PARTNERSHIP FOR SUCCESS

At BouMatic, we are proud of our long-term relationships with dairy farmers around the world. We focus our efforts on our customers. In everything we do, at every level, we work for you, because our success comes from your success.

"The CapriMAX milking cluster is easy to handle, very light, unbreakable, and allows for quick attachment to the goats.

In everyday life, it is a very pleasant and practical cluster to use."
